

**Notice of Addendum**

**ADDENDUM #3  
Next Generation (NG) 9-1-1 Phone System  
Jefferson County, WI  
(1 Page Total)  
May 11, 2015**

**Notice to All Firms:**

This Addendum is issued on May 11, 2015 to modify, change, delete from, add to, explain or correct the original Request for Proposals or any previous addendums and is hereby made a part of it. In case of conflict between the Request for Proposals and this Addendum, the most recently published Addendum shall govern.

**Questions & Answers**

**Question #1:** Current Cisco Call Manager Version

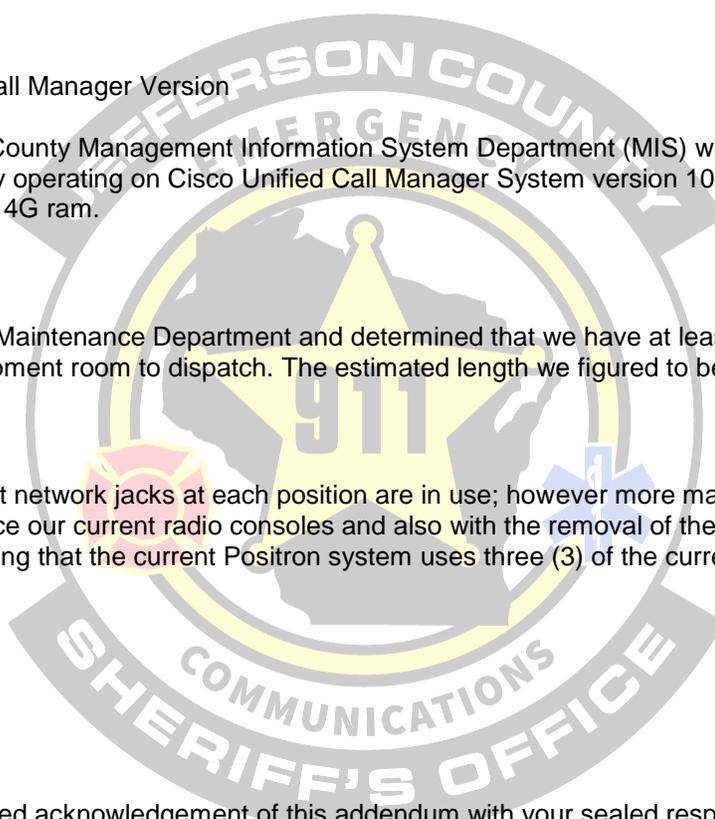

**Answer #1:** According to our County Management Information System Department (MIS) which oversees the county phone system; we are currently operating on Cisco Unified Call Manager System version 10.5.2.10000-5; VMWare Install: 2 vCPU Xenon, 2.4GHz, 80 G, 4G ram.

**Question #2:** Wiring Runs

**Answer #2:** I worked with our Maintenance Department and determined that we have at least two-2 inch open conduits that run from the upstairs equipment room to dispatch. The estimated length we figured to be less than 300 feet.

**Question #3:** Network Jacks

**Answer #3:** Most of the current network jacks at each position are in use; however more may or may not become available this year as we replace our current radio consoles and also with the removal of the current Positron equipment. It does appear from tracing wiring that the current Positron system uses three (3) of the current jack positions.

Return the completed and signed acknowledgement of this addendum with your sealed response for this request.

**Acknowledgment of Addendum (to be returned with your sealed response)**

I \_\_\_\_\_, as an authorized representative of

\_\_\_\_\_ have received this Addendum #3 and fully understand and will comply with all the information contained within this Notice.
